

Emergency Animal Disease and Zoonotic Disease Webinar Program

For veterinarians and para-veterinary staff

NSW Department of Primary Industries, in conjunction with Local Land Services and the Australian Veterinary Association, are relaunching the webinar program for veterinarians and para-veterinary staff in clinical practice, including small, mixed or large animal practitioners. In addition to the 10 original presentations, a new presentation on African Swine Fever has now been included.

The program consists of:

- 11 pre-recorded presentations, each approximately 30 minutes in length, to be viewed anytime between **Thursday 7 May and Tuesday 9 June 2020**.
- 2 live Q&A panel sessions with topic presenters, each 1 hour in length on **Wednesday 3 June 1.00-2.00pm** and **Tuesday 9 June 7.00-8.00pm (AEST)**.

There is no cost to participate in this program.

Veterinarians will be entitled to **6 structured CPD points** if the program is completed. Viewing of all 11 presentations and participation in one of the two Q&A panel sessions are required for completion. Please note, you are not entitled to the CPD points if you have previously completed this program.

Veterinarians may be asked to diagnose or advise on conditions with significant potential economic, social or human health implications. This webinar program brings together speakers to enable practitioners and clinic staff to be better informed in these areas. The Department of Agriculture and Water Resources, and Animal Health Australia, have contributed funding for this program.

Presentation topics:

- Obligations for reporting and notification in NSW
- Submitting samples to the State Veterinary Laboratory
- Antimicrobial resistance
- Prion diseases and the TSE program
- *Brucella suis* and Australian Bat Lyssavirus
- Poultry emergency animal diseases
- Zoonoses from the human health perspective
- Wildlife mass mortalities
- Hendra virus
- Management of unusual non-native animals
- **NEW** - African Swine Fever
